

Press Release

Olivetti at SMAU Milan presents its solutions for Industry 4.0 Smart Factory 4.0 and 3D IoT

Milan, 24th October 2017

Olivetti, technological hub of the TIM Group, participates in the Smau International event, held from 24th to 26th October at Fiera Milano City. With its own desk in the TIM stand, the company presents its innovative solutions based on Internet of Things technologies for facilitating the process of transformation towards Industry 4.0.

Smart Factory 4.0 is a turnkey solution designed for manufacturers and users of industrial machinery. Thanks to a software developed by Alleantia, a new-entry in the sector, it is able to eliminate the complexity of integrating together machines, sensors and IT applications.

The solution consists of an IoT Gateway with Olivetti M2M Smart connectivity and an on-board application that provides not only Plug&Play installation on over 5,000 industrial machines, but also real-time monitoring of the operating parameters of each individual machine.

The **Olivetti 3D IoT** printer (at prototype stage), and equally true for the other models of the Olivetti 3D line, is ideal for rapid prototyping and for the serial production of custom-made products.

3D IoT offers optimised performance in terms of print speed and finish, supporting also remote access and control through integrated Wi-Fi and an Olivetti M2M Smart SIM providing connection to mobile network geographic areas.

Olivetti, a heritage brand of Italian industry, is today the technological hub of the TIM Group, its controlling shareholder. With a wide offer of state-of-the-art HW and SW products, Olivetti is a Solution Provider offering solutions for automating the business processes and activities of SMEs, large companies and vertical markets. Occupying a leadership position in Retail and Office and with strong skills in the Machine-to-Machine, Internet of Things, Cloud Computing and advanced multi-channel sectors, Olivetti is today an outstanding player in the field of digital innovation. Active commercially in over 50 countries worldwide, Olivetti's major markets are Europe, the Far East and South America. More information on www.olivetti.com
