SECURING A GOOD IMPRESSION IN THE OFFICE

Today's offices expect their print equipment to work efficiently and quietly and the PG L2645, PG L2650 and PG L2655 have been designed to perform print tasks with the same excellence in productivity and reliability, as their predecessors, but now they can hardly be seen and are barely heard.

The trio of A4 mono PG L laser printers have been designed to blend in, with their all-cream coloured exterior, but still enable print-outs to be seen on the dark coloured paper-out tray, ensuring that no confidential prints can be left behind, as part of their standard security measures.

On the subject of security these printers have an enormous advantage over previous models: they all have a standard Data Security Kit, which, until now has been an optional extra, enabling the activation of data encryption and overwrite deletion functions.

In addition, users will benefit from reduced cost of ownership and improved care for the environment, through a reduced footprint, new eco-friendly packaging and very low energy consumption.

Meanwhile, the first print-out time is quicker, printing in A5 format is faster and banner printing has been designed to be much more convenient than previous models.
