WITHOUT THE NEED
FOR MANUAL INDEXING

FAST SMART
SEARCHES OF YOUR
ENTIRE ARCHIVE

DOCUMENTS
LOCATED WITH
ONE CLICK

ACCESS CONTENT
IMMEDIATELY

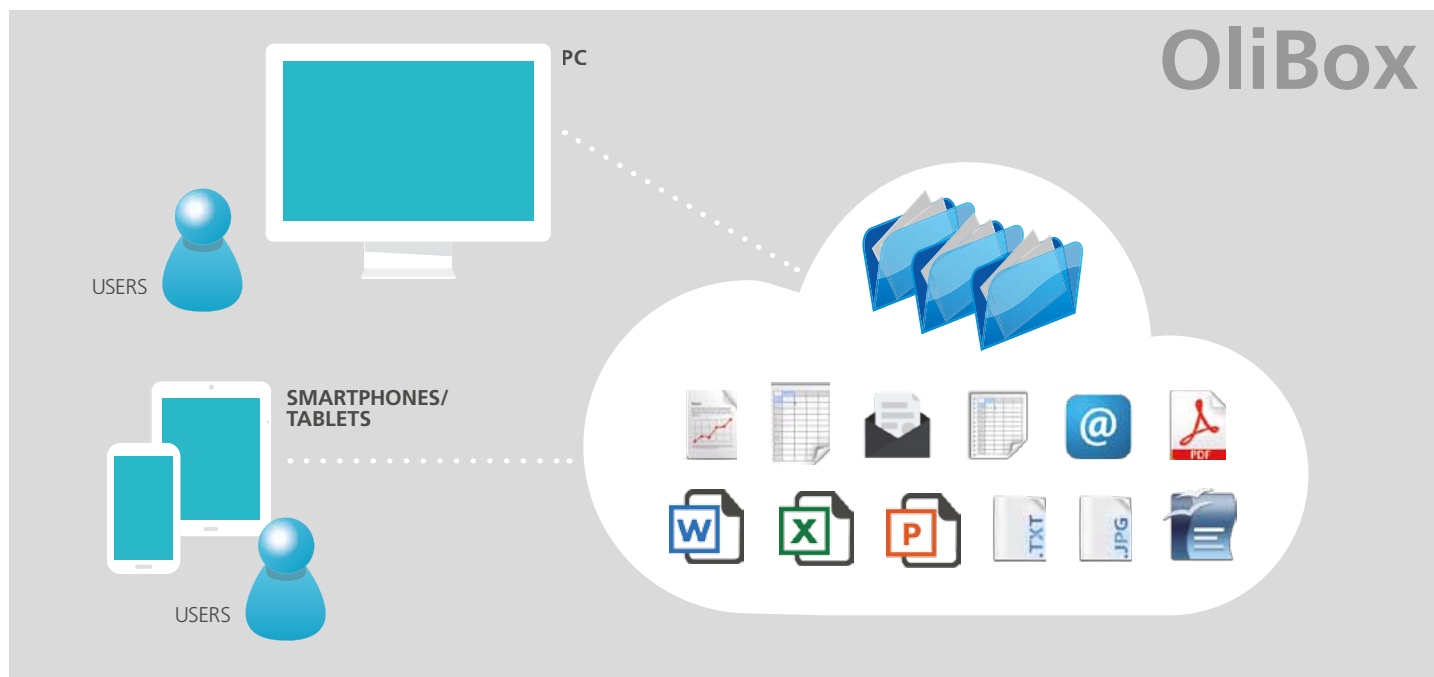

FAST
CONFIGURATION
AND START-UP

OliBox is the **innovative cloud solution** created by Olivetti for managing all types of documents, files and other kinds of information through efficient, universal searches and archival procedures with security guaranteed.

- **OliBox** is able to **archive and index all types of documents, information** (e.g. emails, minutes, invoices, technical specifications, statements, dossiers, reports ...) and **files** in various formats (pdf, word, excel, txt, jpeg etc.) making them **instantly accessible** when you need them.
- The OliBox **innovative search** system in fact offers much more than a simple text search function. Every file in the archive is searched for by **keywords of interest**. Each document is then assigned a **score** based on the relevance of its content with respect to the specified search criteria.
- The solution already offers standard **OCR (Optical Character Recognition)** automated functions, which index the contents of scanned or photographed documents.
- As a result of Olivetti's intensive research into **Big Data innovative technology**, **OliBox** delivers **high performance, security, guaranteed content replication and high reliability**.

USE APPLICATIONS

OliBox can be used for **archiving, managing** and **accessing** all types of company information through **efficient, centralised, universal search functions**:

- **Administrative documentation** (e.g. purchase orders, invoices, contracts, declarations, statements ...)
- **Correspondence** and **emails** (e.g. protocol documentation, communications received...)
- **Technical documentation** (e.g. project dossiers, assessments, minutes, job status, surveying photos, reports ...)
- Documents managed today by each single user using **shared folders** and **file sharing systems** (e.g. working documents, analyses, reports, internal memoranda ...)
- Company-related documentation and information archived on **single user PCs**
- All types of **sector-specific documentation**

ADVANTAGES

OliBox offers a number of advantages:

- **A single system** for managing any kind of document
- **Fast-activating, user-friendly** service
- High level **security** for company information archiving
- **Easy access**
- **Efficient universal searches**
